# Geodyna 500

## Hofmann introduces the latest in wheel balancing technology – the Hofmann Geodyna 500 Cordless Handspin Balancer

This revolutionary wheel balancer is designed for mobile service vehicles, single-bay shops and quick-lube facilities. The Geodyna 500 is equipped with balancing features found on more expensive machine, yet is affordability priced.

### Portable

The cordless feature allows the balancer to be transported for use in the field where no electrical power is available.

### Compact Design

The "500" requires no wheel guard allowing the balancer to accept a wide range of tire and wheel assemblies.

### Seven Balancing Modes

The "500" is equipped with seven balancing modes, static, dynamic and five alloy modes allow use of both hammer-on and adhesive weights to handle most wheel applications.

### Automatic Data Entry

This time saving feature precisely enters the rim distance automatically, eliminating operator errors and customer comebacks.

### Self-calibration by Operator

The operator can re-calibrate the balancer in two easy steps, ensuring accuracy while saving costly service calls.
