TIRE CHANGER

Monty 1520

THE HOFMANN 1520 ENTRY-LEVEL TIRE CHANGER IS DESIGNED WITH ALL THE FEATURES AND DURABILITY OF EXPENSIVE TIRE CHANGERS AT AN AFFORDABLE PRICE.

- **Dual clamping cylinders**
Assures proper clamping power at all four jaws. This eliminates rim slippage in the jaws, preventing damage to expensive alloy wheels.
- **Fourjaw clamping chuck**
The self-centering clamping jaws clamp up to 20" in diameter from the inside, and up to 18" from the outside. Outside clamping protects alloy rims by securely holding the rim without damage, even when mounting/dismounting tires with stiff, narrow sidewalls.
- **Powerful bead breaker**
With 6,000 lbs. of breaking power and a range up to 13" wide, the 1520 can handle the toughest tires.
- **Innovative tire inflation system**
One large air jet is built into each moveable jaw. This provides powerful bead sealing pressure exactly where it is needed.

Hofmann manufactures a complete line of wheel service equipment.

High performance wheel balancers with all automatic data entry

Combination brake lathes for rotors, drums and flywheels.
