

425

TIRE CHANGER

HOFMANN®

425

Specifications

TIRE CHANGER DESIGNED SPECIFICALLY FOR MOTORCYCLE AND ATV'S.

The Hofmann 425 makes changing motorcycle and ATV tires effortless.

- **Innovative design**

The 425 is designed to change all brands of motorcycle wheels including the Harley Davidson belt drive, carts and ATV's.

- **Specially designed clamping jaws**

These clamping jaws are designed to eliminate the additional labor involved in removing the brake disc, sprocket, or drive pulley when servicing a wheel. The jaws have three different rim position clamping from 5" - 23" diameter wheels. There is no need to buy additional sets of clamping jaws for carts and ATV's.

- **Dual clamping cylinders**

Assures proper clamping pressure to all four jaws. Powerful, yet gentle clamping pressure is adjustable so even the most delicate wheels can be clamped without damage.

- **Adjustable tower height**

Tower height is adjustable to handle wide ATV wheels and narrow motorcycle wheels.

- **Complete rim protection**

Clamping jaws, tool head and tire tool are equipped with protective covers to prevent damaging expensive rims.

Shipping Weight.....	290 lbs.
Bead breaker range.....	1.5" to 13.0"
Maximum rim width.....	20.0"
Rim clamping diameter.....	5.0" to 23.0"
Maximum tire diameter.....	40.0"
